

# Download Refraction Lab Answers

Introduction This laboratory was designed to investigate the behaviour of light as it travels through a less dense into a denser medium. Materials: Ray Box with Analysis. 1) A ray directed along a normal does not refract as it moves from one medium another; refraction will occur if the ray is travelling on an angle ...Explore bending of light between two media with different indices of refraction. See how changing from air to water to glass changes the bending angle. Play with ...Refraction of Light Lab Report. Extracts from this ... The angles of refraction that I predicted from the angle of incidences by using Snell's Law are below ...
